High Plains Solar Wind, LLC
 Attn: Ted Hanlon
 102 Avenue B-4
 Cheyenne, WY 82007

Dear Ted:

Thank you for the opportunity to provide a quote on the proposed Laramie County Community College wind turbine project. As you have requested, I've summarized below the costs and other considerations.

ITEM	COST
Decommissioning, Transportation from Medicine Bow and Remanufacturing	55,950
Delivery to Laramie	4,273
Erection and Commissioning	8,763
4 Years Maintenance	24,000
2 Years Additional Warranty (to match 4 years of Maintenance)	5,000
Sub Total	97,950
Less 2% Discount for Advance Payment	1,959
Net Total	\$95,991

As previously discussed, the above assumes the blades are found to be in rebuildable condition with no more than 120 hours going into the blade repair. Terms for the payment plan would be 50% with a signed purchase order and 50% due at turbine commissioning.

Based on the historical performance of Nordtank 65kW wind turbines, the inspection of the unit presently operating at Medicine Bow, the extent of the proposed comprehensive overhaul, and the quality standards employed by EMS, the reconditioned Nordtank is likely to provide many years of service without major component failure. However, for the purpose of projecting worst case repair costs in the future, I've summarized the estimated costs for completely rebuilding certain key components (crane and man time not included).

ITEM	ESTIMATED COST
Gear Box	4,000 to 5,000
Generator	3,500 to 4,000
Blade Set	8,000

These prices are subject to component availability and inflationary pressures.

If you have any other questions, please do not hesitate in giving me a call to discuss.
Thanks again for the opportunity to provide this quote.

Best Regards,
